

Grade: 10th

Teacher: Mr. Eric Crespo (eric.crespo@gmail.com)

Textbook: Burger, Chard, Kennedy, Leinwand; Algebra 2 (Common Core); Holt McDougal.; (2012)

Materials required: Notebook, pencils, erasers, graph paper, and loose leaf paper. Calculators will be used in class and on tests when directed by the teacher. Phones, iPods, mp3 players, or any other devices are not allowed as calculators. Students will also be asked to bring two (2) hanging file folders (shown in class) for the year. Any other materials required will be requested with, at least, five (5) days of prior notice.

Course Description: By the end of the course, the student will be able to recognize and solve problems involving functions; quadratic equations; complex numbers; algebraic expressions; nonlinear relationships including exponential, logarithmic, radical, polynomial, and rational expressions; conic sections; matrices; and sequences and series. This schedule is subject to changes.

Grades: Report cards and progress reports will be implemented as per School Regulation. Grades will be comprised of the following components:

Tests: Tests will usually cover an entire chapter or two. I may review all material prior to each test. Some tests may require two class periods to complete; these will be announced in advance.

Quizzes: Quizzes may or may not be announced. Pop quizzes may be given on Mondays. Quizzes will usually cover 1 or 2 sections in a chapter. I will not review for quizzes; completing and understanding the assigned homework should be sufficient preparation for a quiz.

Homework: Homework will be assigned everyday with the exception of Fridays, except for special occasions. It is the students' responsibility to complete all assigned tasks. I may review some, but not all homework problems. If there is not enough time for review and a student still has questions, the student must see the teacher at the end of class to schedule additional help. **Excellence in mathematics cannot be achieved without a certain amount of practice. Homework is a necessary part of this practice. Homework to mathematics is like basketball practice to the big game. You cannot win unless you practice! You cannot do mathematics if you do not do your homework!**

Conduct: Student conduct will be observed daily and will be counted as part of the final grade. See Student Handbook for additional rules.

Projects: Projects will be assigned during the year. Projects are expected to be turned in on time. Past due projects will be penalized by deducting up to 10 percent of total grade per day of tardiness.

Course Content:

Unit 1: Foundations for Functions

Basic review of algebra I

Exploring Transitions

Parent Functions

Transforming Linear Function

Curve Fitting with Linear Models

Unit 2: Quadratic Functions

Using Transformation to graph Quadratic Functions.

Properties of Quadratic Functions in Standard Form

Solving Quadratic Equations by Factoring and Graphing

Completing the Square

Complex Number and Roots

The Quadratic Formula.

Unit 3: Polynomial Functions

Introduction to Polynomials

Multiplying Polynomials

Dividing Polynomials

Factoring Polynomials

Finding real roots of Polynomial

Fundamental Theorem of Algebra

Investigating graphs of Polynomials

Transforming Polynomial Functions

Curve fitting with Polynomial Models

Unit 4: Exponential and Logarithmic Functions

Exponential Functions and Logarithms and inverse relations of Functions

Logarithmic Functions

Properties of Logarithm

Exponential and Logarithmic Equations and Inequalities

Unit 5: Sequences and Series

Introduction to Sequence

Series and Summation

Arithmetic Sequences and Series

Geometric Sequences and Series

And infinite Geometry Series Mathematical induction

Absence during examinations: When a student misses a test or quiz because of sickness, a retake will be given within 5 school days only if the student provides a valid medical excuse upon his/her return. When a student misses a test or quiz without a valid excuse, he/she will be required to take it upon his/her return to school. Retakes may be given on Mondays. I will **not** provide a review for a retake; it is the student's responsibility to obtain the material and to prepare for the retake. Any other arrangements will be at the teacher's discretion. A retake is **not** the same as the original evaluation.

Absence from class: In the event a student is absent from class, he/she is responsible for obtaining all material taught, including assignments. I will not re-teach any material that a student misses due to absence during class hours; again, it is the students' responsibility to find out what he/she missed and to obtain help. Being absent on the day of a test review will not exempt a student from taking the test on the assigned test day. All additional rules applicable to student absences are as per School Regulation.

Parent/Teacher Appointments: I will work with every parent as much as possible to accommodate meetings after regular school hours. Please understand that under no circumstances should a parent interrupt a class to speak to either myself or his/her child. **If a parent must see his/her child, the parent has to go by the front office first.**

Dear Parents: It is my expectation that by the end of the school year, my students will have gained a wealth of knowledge that will better prepare them for the next grade, for college, and for life in general. We want to have fun while we learn, but I also strongly value the qualities of honor and respect. We will practice these and other values throughout the year.

Communication is essential! I will make every effort to meet with you when needed to help your child succeed in my class. But we have to work together. Please, take the time to review your child's notebook often and ask him/her how their day went at school. Get more involved with your child's education because he/she cannot do it alone. It is normal for some students to struggle with math, but any problem can be resolved if we address the obstacles early on – don't wait until the report card is completed before you ask for help. I believe in your child's ability to succeed. Let's have a great year!
